A Quick Introduction to Text Summarization in Machine Learning

Text summarization refers to the technique of shortening long pieces of text. What's the need for text summarization?

Propelled by the modern technological innovations, data is to this century what oil was to the previous one.

Extraction-based summarization
The extractive text summarization technique involves pulling keyphrases from the source document and combining them to make a summary.

Abstraction-based summarization
The abstraction technique entails paraphrasing and shortening parts of the source document.

Introduce a method to extract the merited keyphrases from the source document.
